Internet Explorer 10 – enabling websites to be viewed in "Compatibility Mode"

Note: If you have <u>Internet Explorer 9</u>, click the little broken page icon to the right of the web address box to run the site in "Compatibility Mode" (If you do not see the broken page icon, follow steps 2-5 below.)

- 1. Open Internet Explorer 10 and then press the "Alt key" to bring up the top menu bar on the web page.
- 2. Locate & <u>click "Tools"</u> on the top menu
- 3. Click Compatibility View settings.

- 4. Do one of the following (a. or b. below):
 - a) If you were already on the <u>www.train.org</u> website, you will see train.org filled in the "Add this website" box. Click "Add" button.

If you are not on the TRAIN website, you can type <u>train.org</u> and click "Add" button. Also type: <u>whatifcolorado.com</u> and click Add.

- b) Or check the box that says:
 - "Display all websites in Compatibility View."
- 5. Click the "<u>Close button"</u> in the bottom right of the Compatibility View Settings box.
